Professional Experience

Founder & Director

Airconstruct HVAC Mackay, QLD

July 2001 - Present

A clear strategic thinker who has dedicated his working life to the HVAC industry. My role at Airconstruct HVAC is to create the future and manage the present, uphold, safeguard and promote the company's values, vision and mission. Execute the responsibilities of a company director according to legal and ethical standards.

I enjoy creating value for our clients so that our point of difference remains clear. In my day to day role I am responsible for developing the skills of my team and accountable for all Design and Construct aspects of the business, as well as negotiating with clients and contractors and liaising with engineers and equipment suppliers to ensure the technical merits of any project are delivered in full. My key strength would be the ability to thrive in high pressure situations so that the end result is a win win for both client, and company.

Key achievements to date:

- Developing a team of tradespeople that have created a recognized industry pocket of excellence.
- Maintaining the safety record of the company through proactive and inclusive leadership.
- Development and rollout of our third party certified ISO Systems
- Developed the I hazard safety app & platform to report safety functions through technology.
- Panelist at the AIRAH Future of HVAC conference in September 2019.
- Completion of HVAC Fault Detection machine learning project with CSIRO October 2019
- Winner Best Investor Pitch KPMG METS Accelerator program. June 2019
- Development of NAT10829- Certificate 2 - Airconditioning Hygiene Course
- Appointed Secretary of the Indoor Air Quality Association of Australia

Subcontract Refrigeration Mechanic and Installer

Sep 1993 to Jun 2001

Engaged by various Tier 1 H.V.A.C. companies to carry out ducting installation, chilled water and DX piping installation, commissioning and tenancy retrofit work. In this position I am held responsible for autonomous performance and execution of contract work, liaising with customers and project managers, managing variations and maintaining the building program.

Airconditioning Refrigeration Mechanic and Installer

Jan 1985 to July 1989

I commenced working in the air conditioning industry in Newcastle NSW with Stenberg Airconditioning, a family business employing around 60 people. In this time I was involved in large government projects delivered by what was then called "Public Works" and residential work from Taree to Gosford. installing and servicing HVAC systems in Police Stations, Court Housed Hospitals, Civic Buildings and Industrial sites around the Newcastle Industrial areas and the Hunter Valley as well as Williamtown RAAF Base.

Professional Associations

- Fellow of the Australian Institute of Management.
- Secretary of the Indoor Air Quality Association of Australia.
- Member Australian Institute of Refrigeration Airconditioning and Heating (10 years)
- Member of the AIRAH Special Technical Group on Indoor Air Quality

Personal Interests

- Aviation – Helicopters, fixed wing aircraft, human performance limitations.
- Music – Acoustic and electronic kits, hand drumming.
- Water sports – Jet skiing, wakeboarding, sailing.
